## TODAY'S SPEAKER

AL KNIGHT introduced Richard Halkyard, a professor at New Haven's Gateway Community College. He is the Program Coordinator for the Railroad Engineering Technology curriculum. His program, titled "Training Workers for the 21st Century Rail Transportation", cited the many improved developments in engineering and worker training. He said, "It's not your father's railroad anymore." Gone is the hiring practice of "friends or relatives". Now the emphasis is on education and training. Very soon we will see solar powered trains, driverless trains and Automatic Fare Collection, seamless travel where a passenger can use any form of interconnected travel without ever showing a ticket. Mag Lev trains are now operating in Washington, DC. and in the planning, is the Hyperlink Vacuum TubeTrain envisioned by Elon Musk.

Soon high-speed trains will not have to slow down for banked turns. New tilt technology will allow trains to continue at high speed on curves while passenger cars will remain upright. To prevent the horrific accidents due to sleep deprived trainmen, Positive Train Control Systems that will stop or slow down an out of control train will soon be installed. Professor Halkyard's students, with their wide range of specialized skills, will be ready to embrace all these advancements in railroading.

### MEMBER PROFILE

This the eighteenth in a series of Member Profiles intended to allow members to get to know one another beyond a face and a name tag

KLAUS H. JANDER was born on May 17, 1940 in Glogau, Germany, which was formerly Prussia but is now in Poland. He grew up near Munich, Bavaria where he had his early schooling. One of his older brothers and his father were killed in action on the Russian front in 1943 while in the German army.

Klaus came to the United States in 1953 at age 13 as a Displaced Person together with his grandparents. His mother came later because she did not qualify as a Displaced Person.

In the US he attended and graduated in 1958 from Richmond Hill High School in Queens as valedictorian. He went to City University of NY (Queens College) and graduated with a BA (cum laude) in philosophy in June 1961. While at college he joined the Marine Reserves and after going for Platoon Leader training at Quantico, VA, he received a commission, but soon thereafter got an inter service transfer to the U.S. Air Force.

*“ I was 1-A and there was a draft and I knew I would have to be drafted or otherwise sign up . I wanted to be an officer. At Queens College there was an Air Force ROTC which I had joined but it was closed down in my first year due to low enrollment. So I signed up for the Marine PLC Program and went to Quantico for the summer. At Cornell Law School my old professor of Air Science at Queens had been transferred there and he helped me get my inter-service transfer back to the Air Force.”*

From there he went to Cornell University Law School graduating with a Juris Doctor Degree in June 1964.

In 1966 Klaus married Deborah I. Jander (van Alst). They had met at Queens College and have one son, Dietrich, born in 1974, who is unmarried.

*Reserve Brigadier General (Ret) Klaus Jander*

In early 1965 Klaus was called to active duty in the US Air Force where he served until 1968. He was primarily stationed in Chateauroux, France, and Ramstein, Germany, near Saarbruecken where he also attended the University of the Saar receiving a German Doctor of Laws degree in 1968. While in the Air Force Reserves he attended and graduated in 1970 from Squadron Officers School, in 1974 from Air Command & Staff College and in 1980 from the Air War College. Klaus remained in the active Air Force Reserve as a Mobilization Augmentee (IMA) in various active Air Force units and levels until retirement in 1991 as Senior IMA at HQs. 21<sup>st</sup> Air Force, McGuire AFB, and Senior IMA to the Director of the Secretary of the Air Force Personnel Council in the Pentagon. He retired as a Reserve Brigadier General.

After active duty Klaus was an associate, and from 1972 till 1989, a partner in the law firm Alexander & Green in New York, doing both major international corporate and litigation work, primarily on behalf of German and other European businesses. In 1989 he became a partner at Rogers & Wells, New York and Chairman of the German and Central European Practice Group as well as Head the firm's Frankfurt office. From 1997 on he was also a member of the law firm's Executive Committee.

At the beginning of 2000 Rogers & Wells merged with Clifford Chance of London and Puender Vollhard & Weber in Germany, which was then Germany's largest law firm, to form Clifford Chance LLP. He retired from Clifford Chance in May 2006.

Klaus remains active, advising diverse clients and participating in numerous pro bono and other activities. He is still a director on several corporate boards and continues to maintain his law license. He has co-authored two books on transnational corporate legal topics in both German and English, as well as over 30 articles in various professional publication in both German and English.

Currently he is a member of the Greenwich RTM and an alternate member of the Town Claims and Land Use Committees. He is also an alternate member of the Inland Waterways and Wetlands Agency (IWWA).

Klaus is a member of the University Club in NYC, the St. Andrew's Club in Hastings-on-Hudson and the Horseneck Club in Greenwich, CT. He is also a member of various local

social clubs and groups around Greenwich. He and Deborah enjoy swimming, skiing and foreign travel. In 2012 he joined the RMA and is currently a Director at Large
